

**2024 Eastern Canada Crop Sevita Permitted Crop Protection Product List**

2024-01-20

This certificate is created to assure Japanese buyers that during soybean production, Sevita's contract IP soybean growers have only applied the chemical products listed below. Each product below has been registered in Canada by the Pesticide Management Review Agency (PMRA) and has a Canadian Maximum Residue Level (MRL) that is compliant with the MRL established by MHLW in Japan. Each chemical applicator in Canada is licensed and trained to apply these products according to the application rates specified on the product label and approved by the PMRA. Producers are also permitted to use new products not listed below as long as the products are registered by PMRA and label instructions are followed.
